

CSS CAREERS

PROJECT MANAGER / TECHNICAL ESTIMATOR

📍 WALSALL, UK

Delivering reliable solutions for complex subsea challenges, everyone at CSS plays an essential part in maintaining critical offshore connections for oil and gas operators worldwide.

We are looking for talented individuals to join the CSS team!

JOB ID #0107

RESPONSIBILITIES & TASKS

- Project management responsibilities for full scope of project activities
- Technical estimator working with engineering team to provide costings for ongoing sales
- Responsible for projects progressing according to agreed schedule and cost
- Revise schedules and budgets as necessary in agreement with management
- Responsible for full project scope; client liaison, manufacturing, testing, logistics, quality, documentation, commercial, internal, and external reporting, etc
- Ensure good communication both with clients and internally within CSS between teams, reporting both externally and internally
- Supporting the CSS sales activities; working with the engineering teams to provide an application specific solution and associated costs
- The 'hub' of the business, bringing together all areas; sales, engineering, procurement, workshop, logistics, commercial/finance, management
- Working in a fast paced, engaging, environment with varied day to day activities
- Internally and externally focused tasks, working multiple projects/bids in parallel
- A healthy mix of documentation and physical build/test workshop activities
- High levels of client interaction; both physical office/workshop and remote working
- Opportunities for travel both within the UK and internationally; clients, suppliers, and Norwegian head office

REQUIRED BACKGROUND & SKILLS

- Technical background in an engineering industry, engineering qualification preferred
- Experience of manufacturing activities
- Good interpretation skills of technical drawings
- Excellent maths and English; qualifications required
- Knowledge of relevant industry standards and codes
- Knowledge, and commitment, to good HSE practices

PERSONAL ATTRIBUTES

- High levels of organisation and time management; ensuring priorities are met across multiple projects/bids in parallel
- Team spirit; although it is essential that the applicant can work alone effectively, there is a strong team ethos and it is expected that the applicant can contribute to this
- A strong eye for detail; required both for reviewing client specifications supplied to CSS and for creation of project specific documentation which will be supplied for client approval
- Interpersonal skills; interaction with other teams, chairing internal and external meetings, supplier negotiations, face to face client meetings
- Potential for offshore working
